ROADMAP FOR NEXT STEPS

1. Adding more perspectives to the game

- Medical Practitioners
 - Understand the efforts of doctors to find a diagnosis
- Rare Disease Patient
 - For anyone wanting to get a sense of what patients would be going through

3. Adding a scoring system

- A server that allows multiple users to compete with others and take their spot on the leaderboard
- Different progress bars for engagement, integrity, inclusion and collaboration

2. Adding complexity to the game and interactive scripts

- Multiple levels in mini-games
- Interactable scripts where players can provide input or choose from predetermined options

4. Responsiveness

- Adaptive design for various devices and screen sizes (mobile, tablet)
